## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see amendment, filed 6/24/2004, with respect to Claims 1-19 have been fully considered and are persuasive. The previous grounds of rejection has been withdrawn.

### ***Allowable Subject Matter***

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of a remote control apparatus for a camera. The prior art teaches the use of displaying a map that displays map information. The prior art teaches a method to select a rectangular region of any size or location that will pan, tilt, and zoom the camera to the appropriate location and display the image in that region on a display. However, the prior art does not teach the method of a designation device that allows for the designation of an arbitrary shape. The prior art teaches that a user can designate a rectangular region and the area in the rectangular region is displayed on the display. The prior art does not teach allowing a user to trace free-hand a region as depicted in Figure 6 and then calculating the appropriate pan, tilt, and zoom values accordingly. Therefore, the claims are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
